The success of BB Cream in Korea and Asia creates a legendary in beauty industries in Asia. It successfully capture all the attention from consumer and the magic of BB Cream gives a significant sign that there's lot of potential in the beauty industries in Asia and this market is **Growing...**

What is BB Cream?

BB Cream is "Blemish Balm", is not skin care brand, skin care treatment products nor cosmetics products...It's just merely a concealer or foundation creates to protect, calm and soothe the skin.

It appears that BB Cream was formulated as an after treatment cream for those who underwent laser surgery and soon became popular among Korea celebrities...This is because this natural care cream for delicate sensitive skin has the ability the cover the irregularities on the skin as well as soften skin texture.

Our Proposal: BB Cream

All in 1 Functions

Make Up Base + Sun Protects + Skin Cover + Skin treatment
(Oil Control & Soothing & Hydration & Skin Repair & Brightening)

Make Up Base:

Plurol Diisostearique: An exceptional mild, gentle and PEG-Free W/O emulsifier that;

are totally compatible with the skin's natural hydrolipidic film, and have a *great affinity* to the stratum corneum

protect from transepidermal water loss without being occlusive, therefore contributing to the skin moisturization

stabilize the excretion of sebum

have excellent covering properties, for an improvement of cutaneous protection

are naturally resist water providing longer of sun protection and makeup products

Sun Protects:

CM3K40T4: A silicone dispersion of TiO_2 coated with Alumina and Methicone to gives:

High transparency and UV protection

Dry and good skin feel (thanks to the present of Methicone)

Easy handling during production (no need to wet the pigment)

Skin Covers:

Plurol Diisostearique: provides *excellent covering properties without* leaving the skin feel heavy and tacky. It's even suitable for the *most sensitive skin*.

WE70U, WE55Y, WE70R and WE70B: Pigment dispersion in esters to gives the skin it's *natural skin color*. It is most suitable for use in the purposes of *naked make up*.

SP-500 (Nylon-12) and EA-209 (Ethylene/Acylic Acid Copolymer): The combination of characteristic (particle size, distribution, chemical composition, morphology & texture) gives each Microspheres a *unique feel* and creating *optical blurring* for skin. The look of *lines is diminished*.

Microspheres offer a “*ball-bearing*” effect which will impart finished products with an *elegant silky feel*, increase *payoff* and *enhanced slip*.

Skin Treatment:

Oil Control:

MSS-500/3H: It is use as sebum control thanks to its porosity which is able to *absorbed* 9X of its own weight of oil.

Cytobiol Burdock: The Burdock is well-known especially for its *anti-seborrheic* and *bacteriocidal* properties mainly due to the polyphenols it contains.

Vegetol Witch Hazel MCF2032 Hydro: It is *astringent* (thanks to the hamamelitannin), *healing*, *decongestionnant*, *vulnerary*, *emollient*, *calming* and *soothing* for the skin.

Soothing:

Allantoin: Is *healing*, *moisturizing*, *soothing* and *anti-irritating*.

Vegetol Roman Chamomile LC 276 Hydro: Chamomile flowerheads is a *anti-septic*, *anti-inflammatory*, *healing*, *skin tonic*, *soothing* and *aromatizing* qualities.

Hydration:

Cn-PS2: Corneospheres which is able to *retain 20X its own weight of water*. It is used for *moisturizing* and *restructuring* agent.

Skin Repair :

Vitamin E Acetate: *Act as anti-oxidant, reduces scar and promotes healing.*

Allantoin: *It is a valuable cell-proliferating healing agent which stimulates healthy tissue formation.*

Brightening:

Vegetol Licorice GR456 Hydro: *Has a strong anti-oxidant effect and thus used in cosmetics as skin lightener agent.*

Gs-PPY: Enzyme Papain is used to *exfoliate dead skin cell* and thus leaving the skin look *radiant and bright* for all the time.
